## Professional Summary

Full Stack Developer with practical experience in React, Vue.js, Spring Boot, REST APIs, PostgreSQL/PostGIS, and ArcGIS for geoprocessing. I enjoy creating responsive, user-focused web applications and scalable backend systems. I have developed custom tools that improve productivity and optimise performance. I thrive in agile, collaborative teams and remain committed to delivering high-quality software. Currently pursuing a Technologist Degree in Systems Analysis and Development on a full scholarship, I am eager to continue learning and growing professionally.

## Core Skills

- Front-end: React, Vue.js, Angular, HTML5, CSS3, JavaScript/TypeScript, Bootstrap, Tailwind CSS, Sass
- Back-end: Java, Python, PHP, C++, C, C#, Node.js, Spring, Laravel
- Database Management: PostgreSQL, PostGIS, SQL Server, MySQL, MongoDB
- DevOps Practices: CI/CD, Docker, AWS, Azure
- Geoprocessing: ArcGIS
- Agile Methodologies: Scrum, Kanban
- Version Control: Git, GitHub, GitLab, Azure Repos

## Professional Experience

**Full Stack Developer Intern – Muralis | Mogi das Cruzes, SP - Brazil | Jul 2024 – Present**

- Contribute to multiple company projects, including an IBAMA system for managing environmental authorisations and monitoring protected natural areas in Brazil.
- Develop and maintain responsive web applications using Vue.js for the front end.
- Build and integrate REST APIs with a Spring back end.
- Implement geospatial features using ArcGIS and manage spatial data with PostGIS.
- Collaborate with cross-functional teams using Scrum to deliver high-quality features on time.
- Create custom widgets to streamline area management, improving user productivity within the system.
- Rebuild tools to enhance processing efficiency and significantly reduce loading times, cutting processing time by over 50% through refactoring.

## Education

**Universidade Cidade de São Paulo – Technologist Degree in Systems Analysis and Development** | São Paulo, Brazil | Mar 2024 – Dec 2025 (Expected)

**Escola Técnica Estadual de São Paulo (ETEC) – Technical Course in Systems Development** | São Paulo, Brazil | Feb 2019 – Dec 2021 (3,600h)

## Relevant Courses

- UI/UX Design Course at Cellep (in partnership with Facebook), São Paulo, Brazil | Sep – Dec 2019

- General English Exchange Program at Malvern House School London, London, England | Jul – Aug 2025

## Certifications

- [AWS Partner: Sales Accreditation](#)

- [AWS Partner: Technical Accredited](#)

## Projects
**Fica Fácil – React, Node.js, Sass, JavaScript, PHP, MySQL**

Developed as the final project for the technical course, this platform helps students gain autonomy in managing their study routines by combining technology, education, and time optimization. The project improved users' productivity and organization during their studies.

**My Finances – Spring Boot, React, PostgreSQL, ArcGIS, Bootstrap**

Personal responsive web application designed to help individuals manage personal income and expenses. Features include a secure login and registration system, CRUD operations for income and expenses, automated calculations of balances, and an interactive map using ArcGIS to mark the location where each expense occurred. Built to be fully responsive, ensuring an optimal experience across devices.

## Languages
- Portuguese: Native
- English: B2 (Malvern House School London)
- Spanish: B2
